

**Trplanr**

**Trplanr**  
**Ultimate Attraction**  
**list guide App**  
**V.1.0**

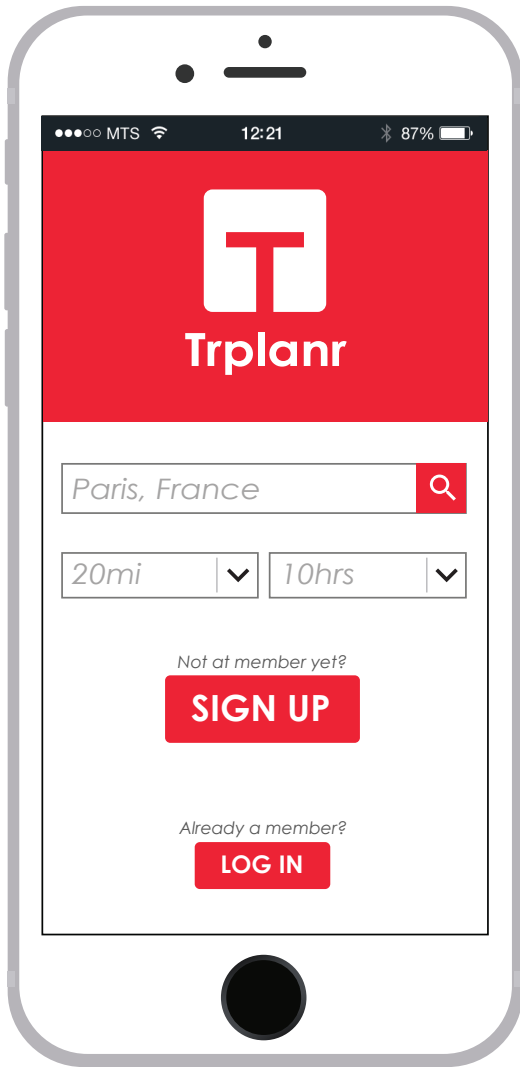

## Objective

Trip planning app where the user can easily browse and choose the places he/she wants to visit.

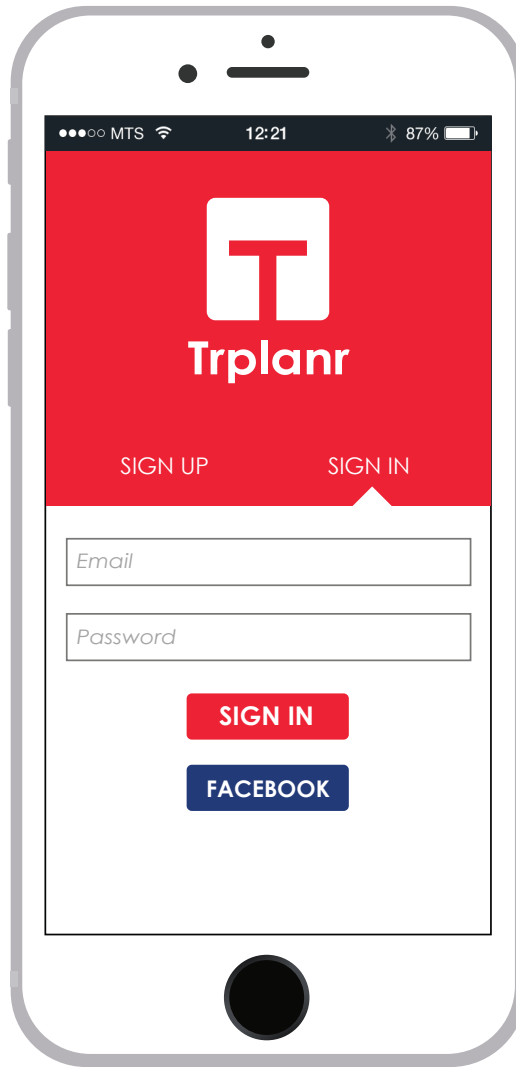

The user will be able to easily create trip itinerary and find new places.

## Strategy

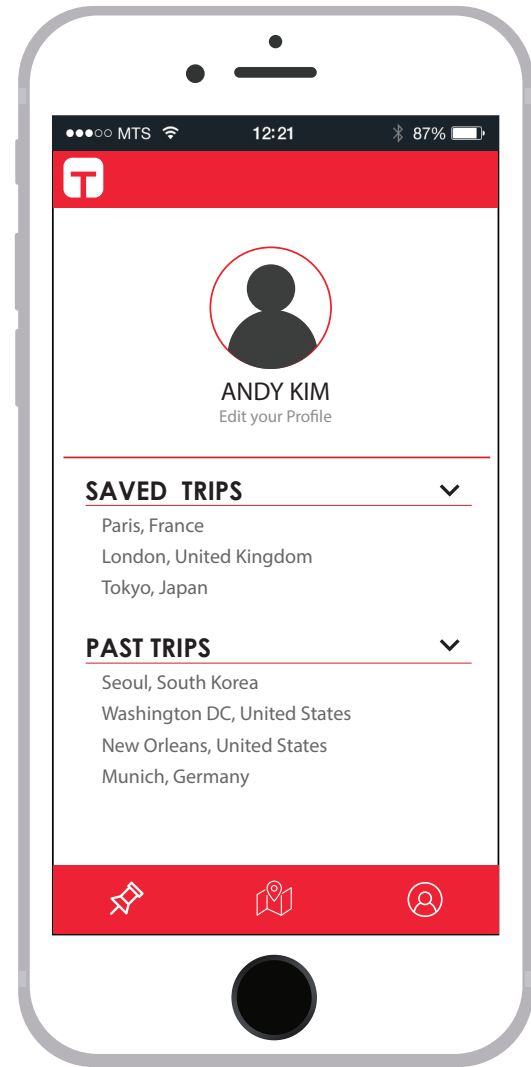

The place of attraction will be presented to the user in a Tinder style with name and type of attraction. The user can either keep or pass the presented location, and after the cycle is done, the webapp will present the user with the list of places chosen, map of the locations, and recommended
