

Andy Kim

Product Designer | kimandy.net

Innovative product designer with a proven record of creating successful design systems, UX/UI, and visual designs across diverse industries. Known for balancing user experience, visual aesthetics, client needs, and timelines to seamlessly manage end-to-end design processes. A self-motivated starter with a background in web development, fostering efficient collaboration with developers.

EXPERIENCE

Cisco Systems, Product Designer

July 2017 - April 2024

- Designed Webex Control Hub Platform UX/UI, collaborating with cross-functional teams to build the product.
- Played a vital role in designing the First Time Sign-up Wizard, including a brand new design, clear instructions, and a malleable user flow, allowing 100+ partner companies to seamlessly sign up for services and hand off to users.
- Redesign of the Momentum Design System, enhancing consistency across the product suite by creating a unified visual language and full accessibility.
- Built a comprehensive documentation website for the Momentum Design System, boosting access to design resources to drive collaboration between developers and designers.
- Innovated a key process allowing designers to launch updates without engineers, by building the code base to render Figma files straight onto the web.

Reingold, Visual Experience Designer

Dec 2015 - July 2017

- Web design and front-end development for public and private sector clients across multiple industries, including medical, education, sports, and entertainment as well as the federal government.
- Delivered exceptional web and email design utilizing skills in WordPress, HTML, CSS/SASS, Photoshop, and Illustrator.
- Created email marketing designs for key clients, leveraging successes to secure 4 additional email campaign clients.
- Increased site traffic 25% via web redesign focusing on accessibility, visibility, and ease of use for an older audience for a client in the medical field.

ADDITIONAL EXPERIENCE

MBC TV News, Producer
